27 MUDGUARD WASHER - ASSORTED - BZP
27 SPRING WASHER - BZP
27 SQUARE PLATE WASHER - BZP
27 ROOFING WASHER - BZP

Nails

A good all round general purpose fixing and is suitable for a variety of applications. Most often used to secure roof and floor joists, partitions and heavy duty fencing. For all types of general carpentry, joinery and fencing.

Round Wire Nail - Flat Head

Wire nails are a good general purpose flat head nail for any carpentry projects. *9314/9316*

Spring Head Nail

A spiral nail with domed washered head. Most commonly used for securing corrugated sheeting to timber in roofing applications and are always galvanised. Designed to absorb movement in the structure; the convex washer covers the hole made by the nail. *9318*

Masonary Nail

Designed to be driven into concrete or the mortar used to hold together bricks or cement blocks. The hardened steel shaft of the nail allows it to be driven into the harder material/ finishes without bending or dulling (becoming blunt) during installation. *9317*

Drive Screw - Round Head

Drive screws for securing corrugated sheets, to be used in conjunction with plastic roofing washers. *9339*

Clout Nail - Flat Head

Clout nail have a short shank and a large, flat head and are normally used in roofing applications to fasten sheet metal to wood. Can also used for a wide variety of exterior/ interior woodworking and building purposes.*9315*

Presser Point Staple

Presser point staples are used to hold fencing firmly in place throughout its life. Staples enter post cleanly and hold well. Consistently manufactured with even length legs and shape. *9319*

Annular Ring Shank Nail - Flat Head

A speciality wire nail that has rings on the shank for extra grip and strength, creating extra withdrawal resistance from lumber. Also used for drywall nails or deck board nails because of the "pullout" resistant feature of the annular rings on the nail shank. *9313*

Bright wire nails have fast become the most popular nail in the UK. The finish is ideal for a variety of carpentry projects. A good general purpose nail.

Screws

A good all round general purpose fixing and is suitable for a variety of applications. Most often used to secure roof and floor joists, partitions and heavy duty fencing. For all types of general carpentry, joinery and fencing.

Deck Screw- Bugle Cross Head

Deck screw designed for use with outside wooden decking. Single thread Decking screws with bugle cross head. Specifically used in Decking applications but also widely used in exterior timber projects. *9338*

Heavy Duty Timber Fixing - Hex Head

Heavy duty timber fixing with green anti corrosion treatment for increased outdoor durability. Timber to timber and component to timber applications. Ideal for structural fixing solutions such as joists, beams, rafters, stairs, floor joists and timber decking projects. *9342*

Roofing Screw Cap

Roofing screw caps are for use with self drill screws and are used for roofing applications. *9341*

Single Head Wood Screw - Pozi Head

General purpose single thread screw with countersunk pozi head for use with MDF, chipboard and soft timbers. *9343*

Twin Head Wood Screw - Pozi Head

General purpose twin thread screw with countersunk pozi head ideal for use for fast driving into hard wood. *9345*

Self Drill Screw for Steel - Hexagonal Head

Self drill screws for steel with integrated washers are used mainly for fixing sheet metal to sheet metal or thick steel beams where exposed to weather. As the screw is driven in the washer compresses making the hole watertight. *9340*

Self Drill Screw for Wood - Hexagonal Head

Self drill screws for wood with integrated washers are used mainly for fixing sheet metal to wood or thick wooden beams where exposed to weather. When screwed in the washer is compressed making the hole watertight. *9340*

Cup Hook

Cup hook is an easy to apply hardware screw in hook. Can be used to hang various items around the home. *9346*

WE RECOMMEND THE USE OF SAFETY GOGGLES WHEN USING OUR PRODUCTS

DECK SCREWS - POZI HEAD - EXTERIOR FINISH

For use on decking boards and hard timber.

NEW BOX RANGE

Fixings

Various fixing sets, wall plugs and heavy duty fixings to secure timber to concrete, block work, solid brickwork and stone.

Shield Anchor Bolt Loose

Anchor shield bolts have a torque controlled sleeve for deep set expansion into concrete, solid brickwork or stone. The expanding sleeve grips the concrete as the bolt is screwed in giving an extremely secure fixing. *9301*

Projecting Shield Anchor Bolt

Projecting anchor bolts have a torque controlled sleeve for deep set expansion into concrete, solid brickwork or stone. The expanding sleeve grips the concrete as the bolt is screwed in. *9337*

Shield Anchor Eye Bolt

For deep set expansion into concrete, solid brickwork or stone. The expanding sleeve grips the concrete as the bolt is screwed in. Typical applications include supporting guy ropes, stays, cables and supporting ladder restraints. *9300*

Shield Anchor

A sleeve anchor is a type of fastener used to secure objects to a concrete or masonry structure. They can be used to join two or more concrete structures, or to fasten an object such as a shelf to a brick wall. *9302*

Wall Plugs

Wall plug with anti-rotation fins (lugs) used mainly for fixing screws into plasterboard. *9308*

Multipurpose Wall Plug

A good multipurpose wall plug to provide a secure location for screws to be applied; in three sizes. For fixing into plasterboard, masonry, concrete or solid brickwork. Drill diameters of 5/6&8mm. *9310101*

Frame Fixing

Frame fixings comprise of a long plug supplied with a fixing screw with crosshead. Primarily designed for use in fixing door and window frames to masonry in one operation. For use in concrete, block or solid brickwork. *9305*

Gun Cabinate Fixing Set

Gun cabinet fixing set specifically designed to ensure a secure fixing of a gun cabinet. Includes 4 x sleeve anchor, 2 x hex bolt and 6 x flat washer. *9306100*

Blind Pop Rivits

Blind Pop Rivets allow two or more components to be joined together from one side of the application and are used mainly in sheet metal fabrication. For use with Pop rivet gun. *9311*

Blind Pop Rivits - Large Flange

Large Flange Blind Rivets allow two or more components to be joined together from one side of the application. The large flange version provides a larger surface area on the installation side of the panel and are mainly used in sheet metal fabrication. *9312*

For use in sheet metal fabrication.

Bolts

A nut is always used together with a bolt. Bolts have a primary function to hold components together. Nuts and bolts serve as the fundamental components in several construction projects as they provide strong bonds under great amounts of pressure.

Hook & Bolt Square Nut

Used in solid walls or concrete foundations to provide a robust anchor for hanging items. The square nut has a greater surface contact so provides greater resistance to loosening. Also less likely to become rounded-off after repeated loosening/ tightening cycles. *9323*

Roofing Bolt & Square Nut

Used to secure roof sheeting onto timber. The nut has a greater surface contact and provides greater resistance to loosening. Also much less likely to become rounded-off after repeated loosening/ tightening cycles. *93424*

Hex Bolt & Nut - Hexagonal Head

Used to secure components in timber and decking applications. The hexagonal head allows easier application and requires no plugs, specialist tools or additional washers and can be engineered to use with a wrench, spanner or pliers.*9320*

Coach Screw (Bolt) - Hexagonal Head

Coach screws (bolts) are heavy duty screws (bolts) designed for metal to timber connections, or to join heavy timbers. The hexagonal head has been engineered to be used with a wrench, spanner or pliers. *9327*

Hex Bolt & Nylon Locking Nut - Hexagonal Head

Heavy duty with an hexagonal head is used to secure weighty components. The nut expands and wraps around the thread as the bolt is forced through the smaller opening when screwed into place, thus "locking" the nut in place. *9341*

Concrete Bolt - Hexagonal Head

Used to drive into concrete, brickwork and breeze block. The hexagonal head allows easier application and requires no plugs, or additional washers and can be engineered to use with a wrench, spanner or pliers. *9322*

Cup Square Bolt & Nut - Round Head

Cup Square Bolt and Hex Nut has a round head and a square neck that prevents the bolt from turning while the nut is tightened. Ideally suited for timber to timber joining. *9321*

Threaded Rod

Used to make bespoke (cut to size) bolts. The rod ends are colour-coded to help you find the correct nut and washer (which are also colour coded) to complete your bolt. Can be used in various applications as you determine the length of the bolt. *3492*

HOOK BOLT AND NUT - BRIGHT ZINC PLATED*

Ideal for use in concrete foundations. *Please note: original finish was yellow zinc passivated.

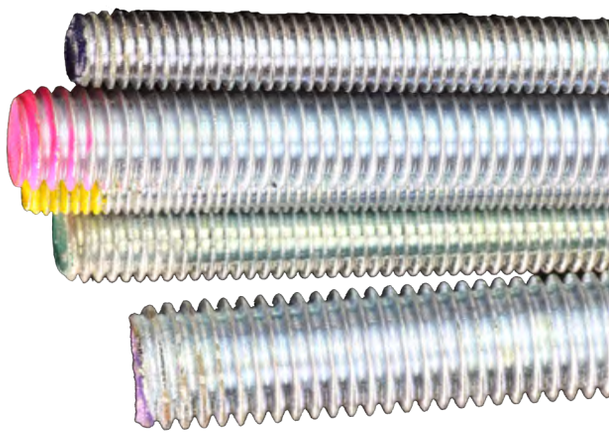
For making cut to size bolts.
Supplied in bundles.



Colour coded to easily
match nuts and washers.

Nuts/Washers

Nuts and washers are used for multiple purposes when mechanical parts are assembled and are essential when using bolts to secure your individual components together .

Hex Nut & Washer

Hex nut and washers are packed in colour coded packaging and used with our threaded bar range to make your own bespoke (cut to size bolts). The washer is used to provide a flat, stable surface for the nut to lie against; to be tightened with pliers or spanners. *3493*

Hex Nut

This general purpose Hex nut is always used with a bolt or machine screw to fasten two components together, can be used in a variety of applications. Can be tightened by hand or with pliers. Larger sizes may require a spanner. *9325*

Nylon Locking Nut

A nylon locking nut has a nylon inset which when tightened expands over the blot or machine screw thread "locking" the nut into place and preventing movement caused by vibration. Need to be applied with pliers and larger sizes may require tightening with a spanner. *9326*

Wing Nut

Wing nuts use with bolts for quick and easy hand tightening and loosening. *9328*

Flat Washer

Flat washers are good general purpose washers that come in various sizes. Paired with nuts and bolts provide a flat surface used to disburse the compression of the nut and bolt smoothly, enabling the nut to remain in place, lessening the possibility of damage. *9333*

Repair Washer

A good general purpose washers which can be used in various applications. Similar to Mudguard washers have a greater surface area and provide a larger bearing surface, spreading the load of a screwed fastening to prevent damage to the surface. *9334*

Mudguard Washer

Similar to repair washers have a greater outer diameter compared to inside diameter. Paired with nuts and bolts they provide a flat surface used to disburse the compression of the nut and bolt smoothly, enabling the nut to remain in place. *9330*

Spring Washer

Designed to absorb a shock, eliminate end play or rattles, maintain fastener tension, compensate for expansion and contraction absorb intermittent shock loads, sustain a load and function as working springs.*9335*

Square Washer

General use with bolts or machine screws providing a greater surface area for contact and are used for limited space applications where a standard washer will not fit. The flat sides can also prevent the washer from rotating. *9336*

Roofing Washer - Plastic

Roofing washer is designed for use in conjunction with springhead nails, drive screws or roofing bolts; for all roofing projects. *9332*

Use with cut to size threaded rod or machine screws.

Colour coded to easily threaded rod.

QUICKTRADE

When you're in the trade, speed is key. Having the facility to order quickly and conveniently is paramount to all of our trade partners. With that in mind we have created an online ordering portal as well as a smart phone and tablet app.

Your account on-the-go!

QuickTrade allows you to order efficiently via an easy to use portal interface which works with your unique account details to show you your prices.

Broken down into easy to understand categories designed to mirror our catalogue, QuickTrade is available to all Eliza Tinsley customers on request and will give you 24/7 easy access to placing orders.

We've also developed an app that works harmoniously with the portal for use on the move.

Working with your handheld device, the app also incorporates a very useful bar code scanning system which allows our trade partners to simply scan product codes directly into your shopping basket for easy and simple re-ordering.

The app and the portal talk to each other so once a communication has been made with the Cloud, your dedicated machine being used as the portal base, will receive details and orders from the mobile app.

Eliza Tinsley

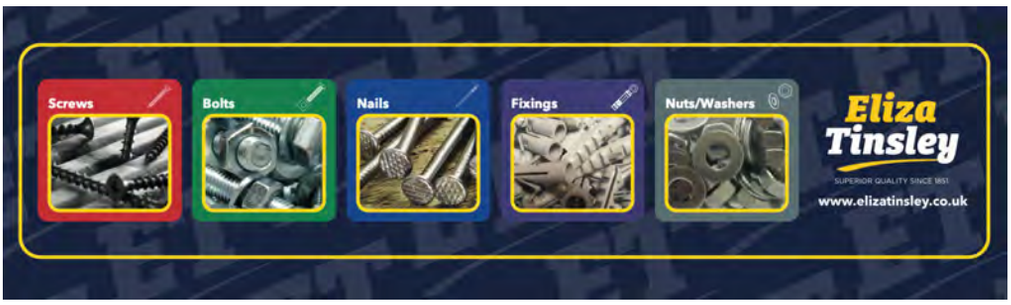
Sign up today! Contact us at quicktrade@elizatinsley.co.uk

Call **0121 502 0055** or your sales representative for further details



Header Boards

Our easy to understand, image driven stand headers, direct your customers with confidence to the products they need. Sporting the renowned Eliza Tinsley brand and with bright colours, these boards can be seen at a distance, easily signposting the stand location.

Bus Stops

Our bus stops offer more detail, giving a more enhanced overview and empowering the customer with the relevant information. Without taking any retail space away from the stand, these bus stops are a great way to educate your customer of the range on offer.

Retail Display Stands

Eliza Tinsley are proud to support our trade customers with eye catching point of sale materials
